PERSONAL PROJECTS

Q&A : A clone of Stack Overflow(only question answer section) (05/2024 - 07/2024)

- This is a full-stack website of an e-commerce website where the user can find his questions and get answers without logging in. If the user wants to perform any action, he has to login or register and then only can proceed.
- The languages I have used in this project include HTML, CSS, Javascript, jQuery, Bootstrap, MySQL, and PHP.

Shoe Factory : eCommerce Website (03/2024 - 04/2024)

- This is a full-stack website of an e-commerce website selling footwear of different categories.
- The languages I have used in this project include HTML, CSS, Javascript, jQuery, Bootstrap, MySQL, and PHP.

Expense Tracker (04/2024 - 05/2024)

- This is a full-stack website of a day-to-day expense tracker where users sign up by providing details and verifying the OTP sent to the email ID provided by the user.
- The features of the app include filtering by ajax, password recovery, reset password, etc.
- The languages I have used here include HTML, CSS, Javascript, jQuery, Bootstrap, MySQL, and PHP.

My PortFolio (11/2023 - 01/2024)

- This website is my personal portfolio containing my educational qualifications, projects, interests, skills, etc.
- The languages I have used in this project include HTML, CSS, Javascript, jQuery, Bootstrap, and React.

Kitchen Recepie Corner (08/2023 - 10/2023)

- This website contains a list of foods with recipes, the ingredients required, and the method to prepare them step by step.
- The languages I have used in this project include HTML, CSS, Javascript, jQuery, Bootstrap, and React.

Crown Resto Restaurent Clone (01/2023 - Present)

- This is a clone of the CROWN RESTO website.
- The languages I have used in the project are: HTML, CSS, Javascript, jQuery, and Bootstrap.

Academia : An Education Site (05/2023 - 08/2023)

- This website is an educational website basically focusing on admission of students, courses available, faculty available, etc.
- The languages I have used in the following project are: HTML, CSS, Javascript, jQuery, and Bootstrap.
